

# Sample Software Requirements Document (SRD)

## Project: User Login Module

### Requirement 1:

The system shall allow users to log in using a registered email address and password.

### Requirement 2:

The email field shall validate the email format before submission.

### Requirement 3:

The password field shall be mandatory and contain at least 8 characters.

### Requirement 4:

If invalid credentials are entered, an error message shall be displayed.

### Requirement 5:

Users shall be redirected to the dashboard after successful login.

### Requirement 6:

Users shall be able to click 'Forgot Password' to reset their password.

*This document is intentionally simple and suitable for testing a LangChain + RAG test case generation project.*
